

Plant Societies Compliance Document

RHS Policy requires all Plant Society Shows, displays and plant sales to be made up solely of 'No New Peat plants' from 01/01/26.

No new peat plants - Plants grown entirely peat free or older plants containing peat which entered the potting system before 31/12/25.

Legacy peat policy - Legacy peat covers any peat that is already in the production system up to 31/12/25. Plants containing no peat at all or only legacy peat are 'no new peat plants'.

Plants do not have to come from a society member that is 100% peat-free – only the plants coming to RHS Plant Society Shows need to meet our policy requirements.

If you have plants that you bring to shows every year that have never been re-potted (or will not be re-potted after 1/1/26), they would be compliant.

The Trader is to sign this declaration that you have seen, understood and confirmed you are compliant with RHS peat-free policy definitions.

Further details are available [here](#).
